64-bit Linux Distribution with a minimum Kernel version of 2.6.23*	✓	✓	✓	✓	✓	✓	✓		
CentOS 6.7 and above*	✓	✓	✓	✓	✓	✓	✓		

It is worth noting that while a product(s) may work on platforms not checked, support is only offered to platforms indicated.

Microsoft has ended support for Windows 2003 (all versions) and Windows XP. FirstClass will be unable to continue to support these platforms.

*** Please note:**

- Windows 2012 Essentials and Foundation Servers - not currently being tested, therefore these operating systems are not currently supported.
- Windows 2012 (All versions), the ReFS file system is not supported.
- Linux Distributions with a Kernel version of 4.0 or greater testing has not completed, therefore these operating systems are not currently supported.
- On a new install, on OS X 10.10.4 and later, the operating system no longer allows the installer to place the fcscctl scripts in /usr/sbin/. fcscctl scripts should be moved from /usr/sbin to /usr/local. The scripts located in "/Library/FirstClass Server/" will need to be updated to point to the newfcscctl script location. This will be addressed in a future full installer release.

*All Operating Systems listed above must be 64-bit architecture.
